

## Student Literacy and Numeracy Assessment

Name: \_\_\_\_\_ Date: \_\_\_\_\_

### Part A: Questions

#### Important notes to Student:

1. You must complete this form without any help. If other people help you, this could lead to you being placed in a course that you are not able to complete. This could lead to a loss of time and money.
2. If you are unable to complete this assessment for any reason, please contact the administration staff at Go Workplace Training for further instruction.

#### Numeracy:

(A calculator may be used)

1. A pallet has 30 boxes on it, each box weighs 10kg and the pallet weighs 40kg.  
What is the total weight?  
= \_\_\_\_\_ kg.
2. A scissor lifts has a working load limit of 200kg. If the person working in the platform weighs 80kg, how many 40kg bags can they carry in the platform with them?  
= \_\_\_\_\_ bags.

#### Literacy:

Read the two paragraphs below and answer the questions at the bottom of the page:

Once a Hazard Control Strategy is in place you should review the situation to see if the risk has been reduced to an acceptable level, and if there is more you can do to reduce the risk. Often a number of strategies need to be used together to reduce risk.

The acceptable level of risk is determined by an organisation's policy, goals and objectives towards safety. Talk to your supervisor or health and safety representative if you are not sure about whether or not the risk has been reduced enough to carry out the work.

**What should you do once a Hazard Control Strategy is in place?**

\_\_\_\_\_

**How is an acceptable level of risk determined?**

\_\_\_\_\_

**Who should you talk to if you are not sure about safety?**

\_\_\_\_\_

If you are unable to complete this form for any reason, please contact the Go Workplace Training office on 1300 82 92 95 within 24 hours of receiving your confirmation e-mail, you may be eligible for a full refund.
